

## Renting offer

We offer you American two-wheel electric vehicles Segway® X2 (off-road version). They are perfect for both private parties and business events. They are also a very good, effective mobile advert carrier, aimed at both wide audiences as well as precisely described destination groups. What is important, they can move along the pavement on the rights of a pedestrian.

Our company is a leader on the Polish market in renting these vehicles. We administer new technically operative vehicles and, what is not less important – qualified and experienced instructors. We treat our duties with full responsibility. All those assets make our clients very happy with our services, which can be seen from our clients' testimonials..

The renting price of a single vehicle includes:

- ✓ renting a vehicle
- ✓ insurance OC
- ✓ transport of the vehicle to its destination place
- ✓ professional instructor who will present Segway and conduct a driving course for the participants.

### **The renting price is determined individually.**

Our prices are competitive – if you declare to rent more than one vehicle or use it for several events, we can negotiate the rates.

#### ***Attention:***

If the event takes place further than 40 km from Warsaw please add to the renting cost the price of additional travel of 1 zł per kilometer. If the event takes longer than one day or in a distance of more than 300 km from Warsaw, please take into account the hotel and attended parking space cost for the crew.

*Any other promotional costs (eg. promodiscs, joystick cover, flags, speakers, LCD screen, lights, crew training) will be paid by the client.*
